## PRODUCT INFO

### MINIMUM QUANTITY PER DESIGN

18" Foil: 10 or more  
 Jumbo Foil: Groups of 5  
 Bubbles, Ultrashapes, Singing: 5 or more  
 Airwalkers, Bouquets, Mailbox Balloons: 1 or more  
 hFill with Air 4" - 14": Groups of 12

Non-metalized nylon.  
 Waterproof and  
 non-electricity conductor.

Bubbles are made of see-through, stretchy plastic. They inflate with smooth, wrinkle-free seams like a beach ball.

Transparent material.  
 Non-electricity  
 conductor.

No Helium Required..!  
 Keep your cost down,  
 inflate with air pump

### NOTES ABOUT FOIL BALLOONS

Over time, helium can escape from a sealed foil balloon. If a balloon begins to look deflated it can be re-inflated.

Helium foil balloons can last for several weeks and can be re-inflated multiple times

For best results, store uninflated balloons away from direct sunlight.

### NOTES ABOUT LATEX BALLOONS

**INCORRECT INCORRECT CORRECT**

Latex balloons will last much longer when filled with air rather than helium.

Temperature changes cause helium inside a balloon to expand or contract.

# COMPANY INFO / POLICIES

## HOURS OF OPERATION

Open 8:30 a.m. to 5:00 p.m., M-F  
Toll Free: (800) 467-0392  
Fax: (410) 398-6435  
Email: sales@nikkisballoons.com

All of our products are available on our website. To order, visit us online at **nikkisballoons.com**

## MINIMUM ORDERS

Our minimum order amount is \$100.00.

## PAYMENTS

We accept Visa, Mastercard, American Express, Discover, PayPal, and Certified Check/Money Order.

All orders **MUST** be prepaid, we do not ship C.O.D.

## SHIPPING / HANDLING

We make every effort to ensure that orders are shipped same day or next day. All orders are shipped via standard ground, unless expedited shipping is purchased. Standard delivery times vary from 1-5 days.

During the seasonal rush, orders may take additional time to process. Nikki's Balloons is not responsible for weather delays to any ground or express shipments and we will not refund any shipping costs in these events.

## FREE SHIPPING POLICY

Balloon orders over \$250.00 receive **FREE** ground shipping (within continental United States)

Items on pages 120-123 do not count towards or qualify for free shipping!

## TYPOS / ERRORS

We are not responsible for typographical errors.

We reserve the right to correct any pricing errors.

Color shades may vary slightly from actual product.

## DAMAGE VS DEFECT

We will not issue credits for individual damaged products. Example, if a customer purchased 100 of a balloon design, and 1 balloon doesn't inflate correctly, this will be considered incidental damage. However, if a large defect is discovered - we will work with our suppliers to correct the situation and replace any defective merchandise.

## RETURNS

Prior to returning merchandise to us, a Return Authorization (RA#) must be obtained by calling Nikki's Balloons. Packages received without a clearly labeled RA# on outside of package will be REFUSED.

If you receive defective merchandise, please notify us within 48 hrs of receipt of product.

Customer is responsible for freight charges on returns. We reserve the right to refuse returns for any reason. If a balloon has stickers/tape on it, or has been cut or used improperly, no credit will be issued. Please see how to properly inflate a foil balloon on page 38.

## SHORTAGES

Nikki's Balloons must be notified of any shortages within 2 days of receipt of delivery.

## DID YOU KNOW..?

### HOW TO PROPERLY INFLATE A FOIL BALLOONS

- Insert the foil nozzle carefully into the valve opening.
- Always hold the balloon straight when inflating. If the valve is bent, it might become damaged.
- Inflate slowly and let air fill smaller parts before inflating body completely. Otherwise, the body may over-inflate and damage the balloon.
- Inflated balloon should yield slightly when you push on them. If the balloon is not flexible anymore, it is over-inflated.

### HOW TO PROPERLY ATTACH A RIBBON

- It is your responsibility to make sure that helium-filled balloons do not escape and float away.
- Before inflating a balloon, you must attach a ribbon and weight (or attach a ribbon and secure it to a fixed object). This helps to ensure that the balloon can be retrieved if it is accidentally released.
- Tie the balloon at the "Tie Ribbon Here" line using a regular knot or the method described below.
- Do not tie the balloon above the "Tie Ribbon Here" line. This may damage the valve and helium will escape faster.

## DID YOU KNOW..?

### THE LARGEST OBJECT EVER LIFTED BY BALLOONS WAS....

...a 4,335lb house!

Inspired by Disney's animated movie, "Up," the crew of National Geographic's How Hard Can It Be? spent two weeks in Los Angeles building and rigging a 4,335lb house and filling 300 8-foot helium balloons. The final balloon cluster itself measured 100 feet tall and carried the house to 10,000 feet

## DID YOU KNOW..?

### WHEN WERE BALLOONS INVENTED?

Balloons, in one form or another, have been around for centuries. However, the modern latex balloon, was invented in New England during the Great Depression.

A chemical engineer, frustrated in his attempts to make inner tubes from this new product, liquid latex, scrawled a cat's head on a piece of cardboard and dipped it in the latex. When it dried, Neil Tillotson had a "cat balloon," complete with ears. He made about 2,000 balloons and sold them on the street during Boston's annual Patriot Day parade.

In the late 1970s, silver metalized balloons were developed for the New York City Ballet. These balloons are commonly called Mylar, but they are actually made from a metalized nylon and are more expensive than latex balloons.

## DID YOU KNOW..?

### WHERE DOES LATEX USED IN BALLOONS COME FROM?

Latex balloons are produced from the milky sap of the rubber tree.

The rubber tree originated in South America and was taken to Europe from Brazil. It is now grown on plantations in many tropical countries.

The latex is collected in buckets, as it drips from harmless cuts in the bark. The process is much like that used to collect maple syrup.
